

A. All pets have an owner

$Ax \text{ inst}(x, \text{pet}) \Rightarrow \exists y \text{ own}(y, x)$   
 $\text{inst}(?x, \text{pet}) \Rightarrow \text{own}(\text{sk0}(?x), ?x)$   
 $\sim \text{inst}(?x, \text{pet}) \vee \text{own}(\text{sk0}(?x), ?x)$

=====  
 $\sim \text{inst}(?x, \text{pet}) \vee \text{own}(\text{sk0}(?x), ?x)$   
=====

B. Cats and dogs are pets

$Ax \text{ inst}(x, \text{cat}) \vee \text{inst}(x, \text{dog}) \Rightarrow \text{inst}(x, \text{pet})$   
 $\text{inst}(?x1, \text{cat}) \vee \text{inst}(?x1, \text{dog}) \Rightarrow \text{inst}(?x1, \text{pet})$   
 $\sim [\text{inst}(?x1, \text{cat}) \vee \text{inst}(?x1, \text{dog})] \vee \text{inst}(?x1, \text{pet})$   
 $\sim \text{inst}(?x1, \text{cat}) \wedge \sim \text{inst}(?x1, \text{dog}) \vee \text{inst}(?x1, \text{pet})$

=====  
 $\sim \text{inst}(?x1, \text{cat}) \vee \text{inst}(?x1, \text{pet})$   
=====

=====  
 $\sim \text{inst}(?x2, \text{dog}) \vee \text{inst}(?x2, \text{pet})$   
=====

C. Pets who have the same owner like each other

$Axyz \text{ inst}(x, \text{pet}) \wedge \text{inst}(y, \text{pet}) \wedge \text{own}(z, x) \wedge \text{own}(z, y) \Rightarrow \text{likes}(x, y) \wedge \text{likes}(y, x)$   
 $\text{inst}(?x3, \text{pet}) \wedge \text{inst}(?y1, \text{pet}) \wedge \text{own}(?z1, ?x3) \wedge \text{own}(?z1, ?y1) \Rightarrow \text{likes}(?x3, ?y1) \wedge \text{likes}(?y1, ?x3)$   
 $\sim [\text{inst}(?x3, \text{pet}) \wedge \text{inst}(?y1, \text{pet}) \wedge \text{own}(?z1, ?x3) \wedge \text{own}(?z1, ?y1)] \vee \text{likes}(?x3, ?y1) \wedge \text{likes}(?y1, ?x3)$   
 $\sim \text{inst}(?x3, \text{pet}) \vee \sim \text{inst}(?y1, \text{pet}) \vee \sim \text{own}(?z1, ?x3) \vee \sim \text{own}(?z1, ?y1) \vee \text{likes}(?x3, ?y1) \wedge \text{likes}(?y1, ?x3)$

=====  
 $\sim \text{inst}(?x3, \text{pet}) \vee \sim \text{inst}(?y1, \text{pet}) \vee \sim \text{own}(?z1, ?x3) \vee \sim \text{own}(?z1, ?y1) \vee \text{likes}(?x3, ?y1)$   
=====

=====  
 $\sim \text{inst}(?x4, \text{pet}) \vee \sim \text{inst}(?y2, \text{pet}) \vee \sim \text{own}(?z2, ?x4) \vee \sim \text{own}(?z2, ?y2) \vee \text{likes}(?y2, ?x4)$   
=====

=====

D. If someone doesn't like pets, then they don't own any

$\forall x \sim \text{likes}(x, \text{pet}) \Rightarrow \sim \text{own}(x, \text{pet})$   
 $\sim \text{likes}(\text{?x5}, \text{pet}) \Rightarrow \sim \text{own}(\text{?x5}, \text{pet})$   
 $\text{likes}(\text{?x}, \text{pet}) \vee \sim \text{own}(\text{?x}, \text{pet})$

=====

$\text{likes}(\text{?x5}, \text{pet}) \vee \sim \text{own}(\text{?x5}, \text{pet})$

=====

E. Pat owns a dog and a cat

$\text{own}(\text{Pat}, \text{dog}) \ \& \ \text{own}(\text{Pat}, \text{cat})$

=====

$\text{own}(\text{Pat}, \text{dog})$

=====

=====

$\text{own}(\text{Pat}, \text{cat})$

=====

F. Chris doesn't like pets

$\forall x \text{ inst}(x, \text{pet}) \Rightarrow \sim \text{likes}(\text{Chris}, x)$   
 $\text{inst}(\text{?x6}, \text{pet}) \Rightarrow \sim \text{likes}(\text{Chris}, \text{?x6})$   
 $\sim \text{inst}(\text{?x6}, \text{pet}) \vee \sim \text{likes}(\text{Chris}, \text{?x6})$

=====

$\sim \text{inst}(\text{?x6}, \text{pet}) \vee \sim \text{likes}(\text{Chris}, \text{?x6})$

=====

F. Fido is a dog

=====

$\text{inst}(\text{Fido}, \text{dog})$

=====

G. Fluffy is a cat

```
=====
inst(Fluffy, cat)
=====
```

Given:

1.  $\sim \text{inst}(?x, \text{pet}) \vee \text{own}(\text{sk0}(?x), ?x)$
2.  $\sim \text{inst}(?x1, \text{cat}) \vee \text{inst}(?x1, \text{pet})$
3.  $\sim \text{inst}(?x2, \text{dog}) \vee \text{inst}(?x2, \text{pet})$
4.  $\sim \text{inst}(?x3, \text{pet}) \vee \sim \text{inst}(?y1, \text{pet}) \vee \sim \text{own}(?z1, ?x3) \vee \sim \text{own}(?z1, ?y1) \vee \text{likes}(?x3, ?y1)$
5.  $\sim \text{inst}(?x4, \text{pet}) \vee \sim \text{inst}(?y2, \text{pet}) \vee \sim \text{own}(?z2, ?x4) \vee \sim \text{own}(?z2, ?y2) \vee \text{likes}(?y2, ?x4)$
6.  $\text{likes}(?x5, \text{pet}) \vee \sim \text{own}(?x5, \text{pet})$
7.  $\text{own}(\text{Pat}, \text{dog})$
8.  $\text{own}(\text{Pat}, \text{cat})$
9.  $\sim \text{inst}(?x6, \text{pet}) \vee \sim \text{likes}(\text{Chris}, ?x6)$
10.  $\text{inst}(\text{Fido}, \text{dog})$
11.  $\text{inst}(\text{Fluffy}, \text{cat})$

Prove: Chris doesn't own Fido  
 $\sim \text{own}(\text{Chris}, \text{Fido})$
